The Global Innovation Index (GII) ranks world economies according to their innovation capabilities.

Consisting of **roughly 80 indicators**, grouped into innovation inputs and outputs, the GII **aims to capture the multi-dimensional facets of innovation**.

Estonia ranking in the Global Innovation Index 2023

> Estonia ranks 16th among the 132 economies featured in the GII 2023.

Estonia ranks 15th among the 50 highincome group economies.

> Estonia ranks 9th among the 39 economies in Europe.

> Estonia GII Ranking (2020-2023)

The table shows the rankings of Estonia over the past four years. Data availability and changes to the GII model framework influence year-on-year comparisons of the GII rankings. The statistical confidence interval for the ranking of Estonia in the GII 2023 is between ranks 15 and 18.

	GII Position
2020	25th
2021	21st
2022	18th
2023	16th

Innovation Inputs	Innovation Outputs
25th	20th
24th	20th
15th	22nd
14th	16th

Estonia performs worse in innovation outputs than innovation inputs in 2023.

This year Estonia ranks 14th in innovation inputs. This position is higher than last year.

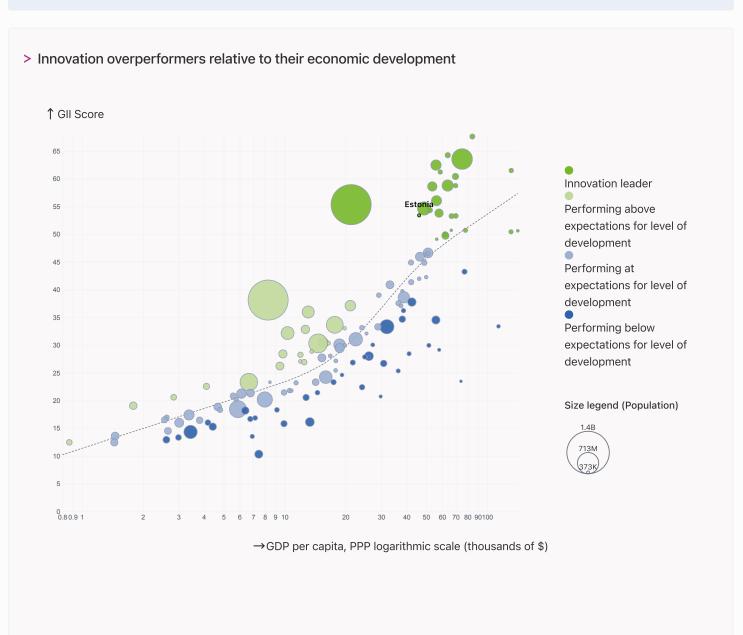

Estonia ranks 16th in innovation outputs.
This position is higher than last year.

→ Expected vs. observed innovation performance

The bubble chart below shows the relationship between income levels (GDP per capita) and innovation performance (GII score). The trend line gives an indication of the expected innovation performance according to income level. Economies appearing above the trend line are performing better than expected and those below are performing below expectations.

> Estonia is an innovation leader, ranking in the top 25 of the GII.

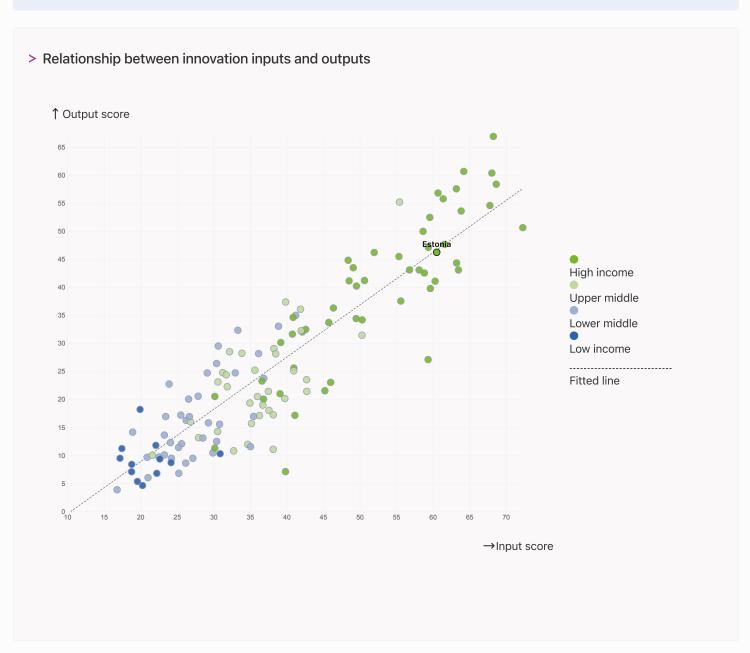

→ Effectively translating innovation investments into innovation outputs

The chart below shows the relationship between innovation inputs and innovation outputs. Economies above the line are effectively translating costly innovation investments into more and higher-quality outputs.

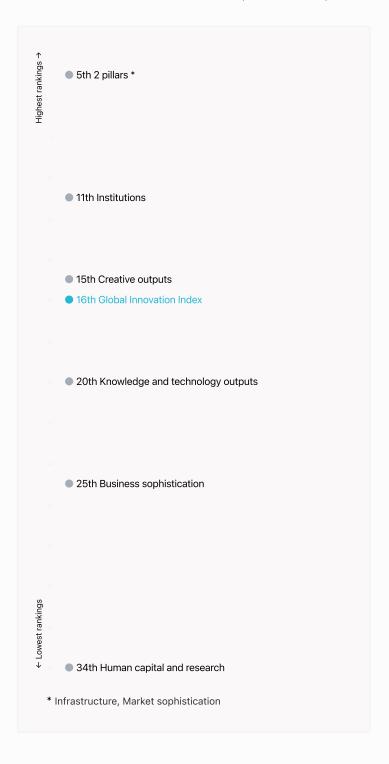

> Estonia produces less innovation outputs relative to its level of innovation investments.

→ Overview of Estonia's rankings in the seven areas of the GII in 2023

The chart shows the ranking for each of the seven areas that the GII comprises. The strongest areas for Estonia are those that rank above the GII (shown in blue) and the weakest are those that rank below.

> Highest rankings

Estonia ranks highest in Infrastructure, Market sophistication (5th), Institutions (11th) and Creative outputs (15th).

> Lowest rankings

Estonia ranks lowest in Human capital and research (34th), Business sophistication (25th) and Knowledge and technology outputs (20th).

The full WIPO Intellectual Property Statistics profile for Estonia can be found on this link.

→ Benchmark of Estonia against other country groupings for each of the seven areas of the GII Index

The charts shows the relative position of Estonia (blue bar) against other country groupings (grey bars), for each of the seven areas of the GII Index.

> High-Income economies

Estonia performs above the high-income group average in Knowledge and technology outputs, Creative outputs, Business sophistication, Market sophistication, Infrastructure, Institutions.

> Europe

Estonia performs above the regional average in Knowledge and technology outputs, Creative outputs, Business sophistication, Market sophistication, Infrastructure, Institutions.

Knowledge and technology outputs

Top 10 | Score: 58.96

Estonia | Score: 43.68

Europe | Score: 38.80

High income | Score: 38.62

Creative outputs

Top 10 | 56.09

Estonia | 48.77

High income | 40.27

Europe | 39.87

Business sophistication

Top 10 | 64.39

Estonia | 64.31

Top 10 | 62.83

High income | 55.85

Europe | 54.69

Institutions

Top 10 | 79.85

Estonia | 78.60

High income | 68.16

Europe | 61.69

→ Innovation strengths and weaknesses in Estonia

The table below gives an overview of the indicator strengths and weaknesses of Estonia in the GII 2023.

> Estonia's main innovation strengths are **Government's online service** (rank 1), **ICT services imports**, % **total trade** (rank 1) and **Unicorn valuation**, % **GDP** (rank 1).

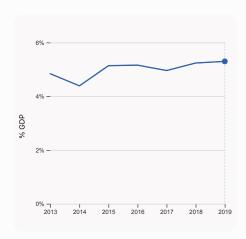

Strengths Weaknesses

Rank	Code	Indicator name	Rank	Code	Indicator name
1	3.1.3	Government's online service	101	4.3.3	Domestic market scale, bn PPP\$
1	5.3.3	ICT services imports, % total trade	89 6.2.3 Software spending, % GDP		Software spending, % GDP
1	6.2.2	Unicorn valuation, % GDP	87	5.3.1	Intellectual property payments, % total trade
1	4.2.4	VC received, value, % GDP	76	3.3.1	GDP/unit of energy use
1	4.2.3	VC recipients, deals/bn PPP\$ GDP	74	7.1.3	Global brand value, top 5,000
3	1.3.2	Entrepreneurship policies and culture	62	5.2.2	State of cluster development
3	3.1.4	E-participation	60	5.3.2	High-tech imports, % total trade
3	7.2.2	National feature films/mn pop. 15-69	53	7.1.1	Intangible asset intensity, top 15, %
4	3.3.3	ISO 14001 environment/bn PPP\$ GDP	51	2.1.2	Government funding/pupil, secondary, % GDP/cap
4	2.1.4	PISA scales in reading, maths and science	40	2.3.3	Global corporate R&D investors, top 3, mn US\$

→ Estonia's innovation system

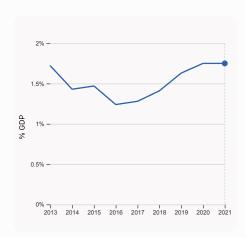

As far as practicable, the plots below present unscaled indicator data.

> Innovation inputs in Estonia

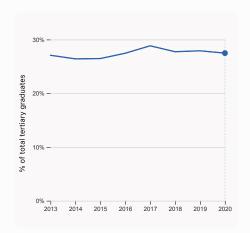

2.1.1 Expenditure on education, % GDP

was equal to 5.3% GDP in 2019, up by 0.06 percentage points from the year prior – and equivalent to an indicator rank of 26.

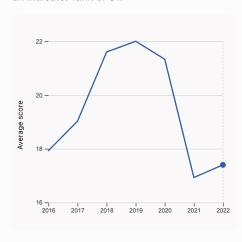

2.3.2 Gross expenditure on R&D, % GDP

was equal to 1.75% GDP in 2021, with no change from the year prior – and equivalent to an indicator rank of 22.

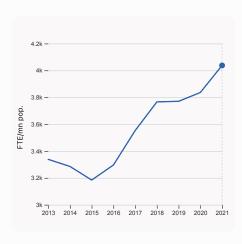

2.2.2 Graduates in science and engineering, %

was equal to 27.48% of total tertiary graduates in 2020, down by 0.43 percentage points from the year prior – and equivalent to an indicator rank of 31.

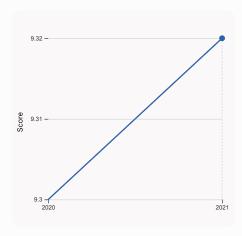

2.3.4 QS university ranking, top 3

was equal to an average score of 17.4 for the top 3 universities in 2022, up by 2.78% from the year prior – and equivalent to an indicator rank of 56.

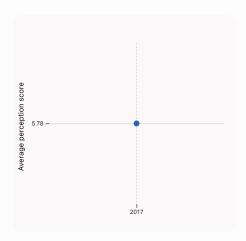

2.3.1 Researchers, FTE/mn pop.

was equal to 4,037.39 FTE/mn pop. in 2021, up by 5.25% from the year prior – and equivalent to an indicator rank of 27.

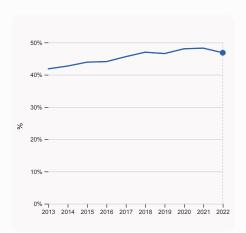

3.1.1 ICT access

was equal to a score of 9.32 in 2021, up by 0.22% from the year prior – and equivalent to an indicator rank of 23.

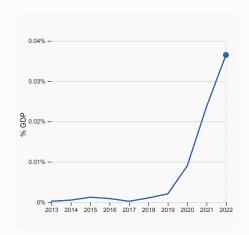

4.1.1 Finance for startups and scaleups

was equal to an average perception score of 5.78 in 2017, equivalent to an indicator rank of 11.

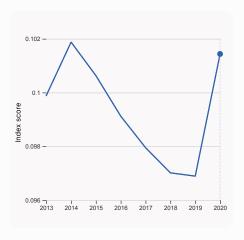

5.1.1 Knowledge-intensive employment, %

was equal to 46.83% in 2022, down by 1.42 percentage points from the year prior – and equivalent to an indicator rank of 17.

4.2.4 VC received, value, % GDP

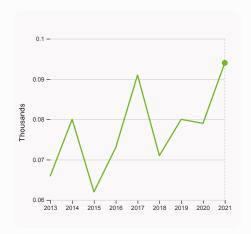

was equal to 0.03649% GDP in 2022, up by 0.013 percentage points from the year prior – and equivalent to an indicator rank of 1.

4.3.2 Domestic industry diversification

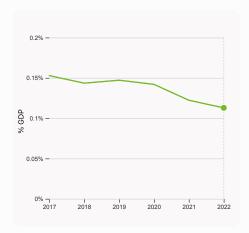

was equal to an index score of 0.101 in 2020, up by 4.69% from the year prior – and equivalent to an indicator rank of 17.

> Innovation outputs in Estonia

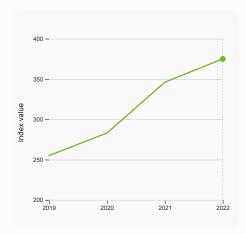

6.1.1 Patents by origin

was equal to 0.094 Thousands in 2021, up by 18.99% from the year prior – and equivalent to an indicator rank of 41.

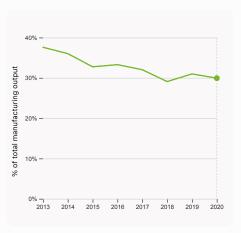

6.2.3 Software spending, % GDP

was equal to 0.113% GDP in 2022, down by 0.0094 percentage points from the year prior – and equivalent to an indicator rank of 89.

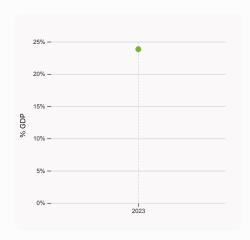

6.1.5 Citable documents H-index

was equal to an index value of 375 in 2022, up by 8.38% from the year prior – and equivalent to an indicator rank of 48.

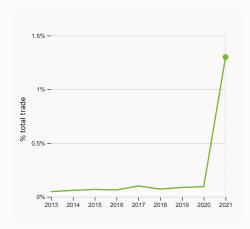

6.2.4 High-tech manufacturing, %

was equal to 29.94% of total manufacturing output in 2020, down by 1.05 percentage points from the year prior – and equivalent to an indicator rank of 37.

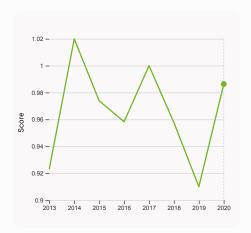

6.2.2 Unicorn valuation, % GDP

was equal to 23.84 % GDP in 2023 – and equivalent to an indicator rank of 1.

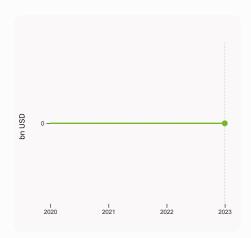

6.3.1 Intellectual property receipts, % total trade

was equal to 1.3% total trade in 2021, up by 1.2 percentage points from the year prior – and equivalent to an indicator rank of 27.

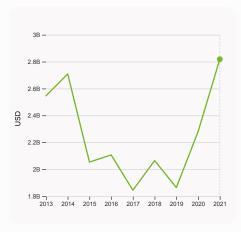

6.3.2 Production and export complexity

was equal to a score of 0.986 in 2020, up by 8.4% from the year prior – and equivalent to an indicator rank of 27.

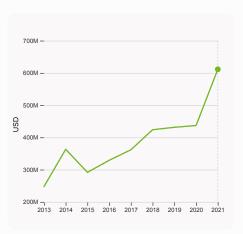

7.1.3 Global brand value, top 5,000

was equal to 0 bn USD in 2023 – and equivalent to an indicator rank of 74.

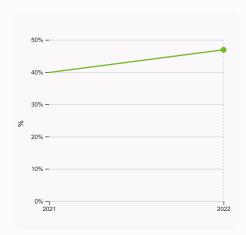

6.3.3 High-tech exports

was equal to 2,818,161,795 USD in 2021, up by 23.64% from the year prior – and equivalent to an indicator rank of 18.

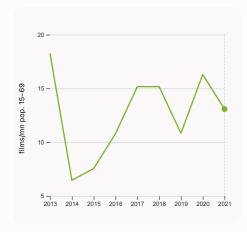

7.2.1 Cultural and creative services exports

was equal to 611,368,000 USD in 2021, up by 39.9% from the year prior – and equivalent to an indicator rank of 11.

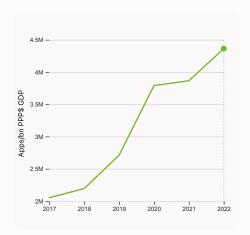

7.1.1 Intangible asset intensity, top 15, %

was equal to 46.91% in 2022, up by 7.04 percentage points from the year prior – and equivalent to an indicator rank of 53.

7.2.2 National feature films/mn pop. 15-69

was equal to 13.08 films/mn pop. 15–69 in 2021, down by 19.75% from the year prior – and equivalent to an indicator rank of 3.

7.3.4 Mobile app creation/bn PPP\$ GDP

was equal to 4,363,930.98 Apps/bn PPP\$ GDP in 2022, up by 12.9% from the year prior – and equivalent to an indicator rank of 6.

→ About the Global Innovation Index

- The Global Innovation Index (GII) is published by the World Intellectual Property Organization (WIPO), a specialized agency of the United Nations.
- Recognizing that innovation is a key driver of economic development, the GII aims to provide an innovation ranking and rich analysis referencing around 130 economies. Over the last decade, the GII has established itself as both a leading reference on innovation and a "tool for action" for economies that incorporate the GII into their innovation agendas.

The Index is a ranking of the innovation capabilities and results of world economies. It measures innovation based on criteria that include institutions, human capital and research, infrastructure, credit, investment, linkages; the creation, absorption and diffusion of knowledge; and creative outputs.

The GII has two sub-indices: the Innovation Input Sub-Index and the Innovation Output Sub-Index, and seven pillars, each consisting of three sub-pillars.
